

Things i think are super useful that i dont believe get taught early enough or at all.

jupyter notebooks

vscode debugger

Ternary Operators

```
#[if test expression is true] if [test expression] else [if test expression is false]
```

```
"5 is greater than 3" if 5 > 3 else "5 is less than 3"
```

```
# 5 is greater than 3
```

```
"3 is greater than 5" if 3 > 5 else "3 is less than 5"
```

```
# 3 is less than 5
```

List Comprehensions

Comparisons

```
n = ""  
"n exists" if n else "n does not exist"  
# n does not exist
```

```
n = "test"  
"n exists" if n else "n does not exist"  
# n exists
```
